

# Deciduous and Evergreen Trees

Edited by Mrs Smith

twinkl

There are two types of tree:

deciduous

evergreen

What do you think makes a tree an evergreen?  
(The clue is in its name!)

evergreen

# Evergreen Trees

An **evergreen** tree keeps its green leaves all year round.

# Deciduous Trees

A **deciduous** tree loses its leaves each year.

# Deciduous Trees

In **autumn**, the leaves on deciduous trees change colour and fall off.

# Deciduous Trees

In **winter**, deciduous trees usually have no leaves on their branches.

# Tree Hunt Activity

There are lots of different types of deciduous and evergreen trees growing in this country.

Go for a walk and hunt for trees in your local area.

Try to name the trees by looking carefully either at the leaves, nuts or fruits they have produced.

# Tree Hunt Activity

When you find a new tree, look closely at its leaves.

Look at the leaf carefully and try to identify the tree it is from using the tree identification sheet.

If you find a leaf that you can't identify from your sheet, you could download the free British Tree Identification App from the Woodland Trust to help you.

Happy hunting!
