

## Spellbrook Strings – Week 2

Hi String players. This term my plan was to focus on Film Music in our listening sessions. You can still manage this at home and start to understand just how powerful music can be.

This YouTube clip shows how music can affect how we understand images on the screen

<https://www.youtube.com/watch?v=iSkJFs7myn0>

It last just over 5 minutes and is fascinating. Your family will probably enjoy it too!

Here are a few other things you can try this week.

- When you are watching something on TV or watching a film listen to see if there is any music playing in the background. Why do you think the music has been included?
- If you watch any ads online or on TV, is music used? Why do you think that might be?
- If you can, turn off the sound. Does having no music make a difference?

Take care and happy listening!
